

The State of the Art in Watering
Since 1957

B & B SPRINKLERS, INC.

YOUR STATE OF THE ART SPRINKLER SPECIALIST

Thank you for the opportunity to provide you with this packet for a B & B Sprinkler system.

For over 50 years, B & B Sprinkler has been the industry leader in home sprinkler systems for Spokane and the Inland Northwest. At B & B Sprinklers, Inc., sprinklers are our specialty – not a sideline. This allows us to concentrate our efforts toward one goal – to provide you with the most dependable, full coverage system available today.

For most of our customers, this is the first time they have shopped for a sprinkler system and have many questions on what to look for in making their decision. For a moment, set aside price, products, warranties, etc. and consider that what you really are shopping for is a “freedom of life style”; a freedom that comes only if the system is dependable, demonstrates full coverage and uses a controller that is user friendly. A quality system comes from using the best materials, state of the art layout and design and professional installation. At B & B Sprinkler, we address each of the components and back them with the best warranties in the business.

Parts & Materials- We will build your new system using Rainbird Professional & Commercial Grade heads, valves and controllers. Throughout the years we have tried all the brands available and have found Rainbird to be the most dependable, full line of irrigation equipment. Other brands may cost less initially, but that savings will soon be lost to higher maintenance and repair costs. B & B Sprinkler warranties all Rainbird material for 5 years- parts and labor.

Design & Layout- A quality design will consist of many components including water pressure, water flow, head type, head placement and separation of zones (valves). An even “green” does not come from an even blanket of water. We will take into account shaded vs. sunny; lawn vs. shrub beds, parking strips and gardens. All take different amounts of watering. B & B Sprinkler will use our 50 years of experience to provide you with a design that is not only “full coverage” but also the most water efficient-saving a precious resource.

The State of the Art in Watering
Since 1957

B & B Sprinklers, Inc. warranties your system for full coverage.

Workmanship- The actual installation of your system is a key component in the final quality. B & B Sprinkler has pioneered the most modern of installation techniques. We install pipe with machines called vibratory plows that lay pipe without digging a ditch and we carefully hand dig in the sensitive areas such as your flower beds. Then we clean up so you see as little disruption as possible. Our customers regularly comment on how good their yard looks upon completion. Your B & B system comes with a lifetime workmanship warranty.

Simple Drain vs. Blow-out System- For 38 of our 50 years, we have developed a system that enables our customers to follow a simple 4 step process to drain their systems for the winter as opposed to hiring someone every fall to have the system blown out with a large industrial air compressor. Initially, a simple drain system will cost more but will more than pay for itself within a few years. Plus you get a higher quality system. You get a system using a freeze proof pipe developed by Union Carbide. Parts of the system will be gravity sloped to drain with air relief valves.

The first fall season B & B Sprinkler will go through the drain process with you and provide you with written instructions. B & B Sprinkler has over 8000 systems built this way and we offer a lifetime freeze damage warrantee when properly drained following our instructions.

As you consider the purchase price of your new system, please consider the extra value in reduced maintenance costs that a quality B&B Sprinkler system provides.

When you choose a B&B Sprinkler system for your home, you can be confident that "watering" will be one less thing to worry about since you will have chosen the lowest maintenance system available.

Ask your friends and neighbors who have sprinkler systems. Perhaps they are enjoying the extra quality of a B&B Sprinkler. You will see why more Inland Northwest homeowners have chosen B&B Sprinkler for their sprinkler needs and why we were the only Inland Northwest sprinkler company recognized by the Irrigation Association of America as one of the nation's leaders for quality and innovation.

Thank you again for the opportunity to present you this packet and please let us know if we can answer any questions.
